

TREC Transport Supporter

This Australian designed and made product offers protection to those people who need lateral support in the car. Though it is not designed to withstand crash force it does offer better upright positioning for user with special needs. It is used in conjunction with the existing seat belt.

Features:

- Easily fixes to car seat with portable seat mount strap.
- Two height adjustable lateral pads. One of the lateral pads can be swing-away for easy transfer.
- Cross straps and crotch strap are secured with a one-button release buckle.
- Optional Sheepskin sleeve for adding comfort, Headrest for additional support.
