

HOISTING AND STOWING

CHARIOT MOBILITY TRAILER

HOISTING AND STOWING

CHARIOT MOBILITY TRAILER

The **Chariot Mobility Trailer** is a lift on wheels with its own independent suspension to carry the load.

The **Chariot Mobility Trailer** has been designed with ease of operation in mind. Simply bring the platform down to the ground with the push of a button and drive your mobility device right onto the platform. Once on the platform, push the button to raise it back up to the right height and secure your mobility device to the platform. The Chariot Mobility Trailer is also equipped with 360° degree wheels and has a solid hitch connection, which means you don't need to know how to reverse a trailer, as the Chariot goes in whichever direction you go.

FEATURES

-  Power up/down platform with single button operation
-  Independent suspension with 360° degree swivel wheels
-  Retractable self-tensioning belts with one-hand operation
-  Can carry up to 159kgs of load

SPECIFICATIONS

-  **Loading Capacity:** 159kgs
-  **Max Mobility Device Width:** 69cms
-  **Max Mobility Device Wheelbase:** 97.8cms
-  **Hitch Height:** 22 to 41cms

BENEFITS

-  Reduces the effort required for hoisting and stowing your mobility device
-  Provides you with the independence you deserve when travelling to and from your destination
