

AUCURO

Aucuro Dynamic Shower Holder

## **REGAIN YOUR SHOWERING INDEPENDENCE!**

When you shower with a conventional fixed shower head in a seated position, you lose your ability to move in and out of the flow and holding up a hand-held shower head for long periods can be tiring.

## **A REVOLUTION IN SIT-DOWN SHOWERING!**

Aucuro's Dynamic Shower Holder is a dedicated Patent Pending design, that provides handsfree full body showering in a seated position.

## HOW IT WORKS

It works by moving a hand-held shower head via a telescopic arm, allowing you to pivot or extend the shower head wherever you need it, providing a relaxing showering experience.

# BENEFITS:

**Handsfree sit down showering** - Hand-held shower heads are great, however they force you to wash yourself one handed, making the process unpleasant, ineffective and slow. Lathering up out of the water stream gives you more time to wash yourself- With Aucuro's Dynamic Shower Holder, simply re-position the flow by pivoting or extending the telescopic holder, where you need it, when you need it.

**Showering Independence** - Juggling a hand-held shower can be tiring and often leads to people requiring a carer - Aucuro provides an effortless method of moving the shower head around eliminating or reducing the need for assistance.

**Relaxing Experience** - Most importantly it provides you with an enjoyable sit-down showering experience.

**Carer Assist** - Reduces back and shoulder strain – In a nursing home, where staff are showering multiple people, it can be tiring holding hand-held shower heads, Aucuro's dynamic shower holder makes showering multiple people less tiring and more efficient.

**Hand-held use** - The shower head can be removed from the holder for conventional hand-held use.

**Fast Showering** - When you're in a rush - Aucuro's Dynamic Shower Holder is the most efficient way to shower sitting down.

**Effortless Installation** - Clamps to any existing 32mm (1 ¼ inch) diameter vertical grab rail. You can attach your existing hand-held shower head and hose.

**Compatible with standard overhead holders** - The shower head can be inserted into any standard shower holder for standing users.

**Premium Materials** - Made from aircraft grade aluminium, for maximum strength in demanding environments. All plastic components are machined from advanced engineering grade polymers for ultimate sliding performance. The whole device can be immersed and washed in water with mild detergent.

## PROFESSIONAL CARE FACILITIES

**Carer Assist** - Reduces back and shoulder strain - In a nursing home where staff are showering multiple people, it can be tiring holding hand-held shower heads, Aucuro's dynamic shower holder makes showering multiple people less tiring and more efficient.

## FEATURES:

**Dynamic Telescopic Arm** - Pivots and extends to where you need it.

**Safety Adapter** - Locks shower head to the dynamic holder.

**Height Adjustable Clamp** - Adjusts up and down the grab rail for different height people.

**Handle** - Allows you to easily move the telescopic arm.

**Accessories** - You can use your existing shower head, hose and grab rail, these items are not included.

## HEIGHT ADJUSTABLE

Height adjustable clamping system attaches to any standard 32mm (1¼ Inch) diameter vertical grab rail.

## **SAFETY ADAPTER**

The safety adapter locks the shower head to the holder preventing it from accidentally falling during use.

For hand-held conventional use you can remove it by pressing the red release button.

## **SAFETY ADAPTER FITMENT**

The safety adapter simply screws to any standard shower head and hose.

Plunger

Child Lock Pin - Locks  
plunger in place if  
clamp knob is removed

Clamp Knob

## **SAFETY CHILD LOCK**

Push pin locks the plunger onto grab rail if the clamping knob is accidentally removed, preventing the device from falling off.

## **ADAPTER FITS INTO ANY STANDARD RAIL HOLDER**

For family members who stand to shower, the shower head can attach to any standard rail holder.
