## EDGE 3 STRETTO™ FAQs

### WHY WAS THE EDGE 3 STRETTO™ CREATED?

Clinicians and providers have been asking Quantum for a power base that offers exceptional maneuverability in tight spaces. The Edge 3 Stretto™ has an overall width of 52.7 cm with 31.8 cm drive wheels, making it the **narrowest complex rehab base on the market!**

**FUN FACT:** The word *Stretto* in Italian means narrow

### WHAT IS SRS?

SRS (*Smooth Ride Suspension*) is a superior automotive-grade power chair suspension developed after two years of research and consumer feedback.

**WHAT IS SRS?** On the Edge 3 Stretto™, independent SRS has an increased shock absorption due to shock angle. The suspension creates a 30 percent to 45 percent improvement in ride as found through vibration testing. The spring rates have been optimised for maximum obstacle climbing and overall comfort. The Edge 3 Stretto™ is the first mid-wheel drive Quantum base engineered from the ground up with true independent suspension without using an articulating beam.

**What is the maximum speed?** Up to 10 km/h

**How fast can iLevel drive with it?** Up to 5.6 km/h

**How many inches of power seat elevation does**

**iLevel have on it?** Up to 30.5 cm (12")

**Compatible with EZ Lock?** Shortly after launch

**WC 19 crash tested?** Available on all configurations

**Available electronics?** 120A Q-Logic 3 EX

**Maximum range?** Up to 32.7 km/h with 55 AH batteries

**Base weight without seating system?** 57.3 kg

**Base width?** 55.2 cm (21.7") with 35.6 cm (14") drive wheels; 52.7 cm (20.7") with 31.8 cm (12.5") drive wheels

**Weight capacity?** 136 kg

Edge 3 Stretto™ featuring independent SRS technology
