

LEFT FOOT ACCELERATOR

Always in search of innovation to guarantee driving assistance systems at the cutting edge of technology, LEFTDIS gives birth to a new generation solution : ACCELEG. For drivers without the use of their right leg, ACCELEG offers an alternative to the right foot accelerator pedal : a left foot accelerator pedal.

Its technology, for which a European patent request is in process, meets the requirements of 10 years of driving, or 300,000 km.

You have praised for our LEFTDIS, you will love our new ACCELEG.

> I active ACCELEG when I start the car.*

> I press on the left foot accelerator to accelerate.

* Activating ACCELEG automatically locks the accelerator pedal and cuts off acceleration when braking.

THE PLUSES

- > Universal
- > Driving comfort
- > Design
- > Easy to install and use

SAFETY

- > Acceleration cuts out when braking is applied.
- > Right accelerator pedal is deactivated.
- > Original accelerator configuration resumes each time engine stops.
- > The system is activated by the driver, when starting the car.

INSTALLATION

- > Simplified assembly
- > Installation on any vehicle with automatic transmission and an electronic accelerator pedal
- > Can be removed and re-installed

CONFORMITY

- > Complies with ECE R10 Rev.6
