

The Carolift 00 hoist was designed to be simple to use yet powerful enough to lift any wheelchair, scooter or other mobility device weighing up to 40 kg into the boot of your car. You control the hoist via an intuitive four-button hand control, and it does its job about a minute.

Via the hand control, the Carolift 00 hoist does all the heavy work for you. It lifts and rotates the cargo into the boot of your car. All you need to do is lend a slight guiding hand. The Carolift 00 hoist does its job very quickly. Loading or unloading your mobility device can be done in around a minute. All movement is at a smooth and constant pace, you will be in total control all the time.

The clever design of the Carolift 00 shines through in its ease of use. Open your boot, deploy the lift over your mobility device and lower the lift arm. Once within reach, you connect the clever lifting straps. Use as much slack as you need to fit the buckle on the mobility device. Pulling on the loop will tighten both sides simultaneously. Don't worry if the strap is longer on one side. The lift 00 will self-balance the load as soon as it leaves the ground.

Features

-  Lift up to 40 kg
-  Powered lifting and manual swivel
-  Fits almost all car models
-  Easy installation thanks to smart mounting base
-  Operate via control on the hoist
-  CE-marked

Specifications

-  Lift Capacity 40 kg
-  Weight 12 kg (Including mounting bracket)
-  Voltage 24V
-  Current Consumption 5A (at max load)
