AQUATIC POOL WHEELCHAIRS

Enjoy the freedom of the water and get active!

The Aquatic Pool and Wet Area Wheelchairs, designed and manufactured in Australia by Para Mobility, are lightweight, rustproof, self-propelled wheelchairs designed to be fully immersed in salt, chlorinated or fresh water.

This wheelchair is made from quality furniture grade PVC, which will not absorb the heat if left out in the sun, while the strong open weave fabric allows passage of air and water. The solid tyres are ideal for leisure centres, hydrotherapy pools, showering and outdoor environments. These Wheelchairs have been designed for comfort, safety and practicality, and are easily and safely self-propelled. The wheels are also equipped with brakes on each side for added safety.

The Platypus model is used for on ground and ramps while the Pelican model includes a strengthening frame and lifting straps to be used in conjunction with Pelican Pool Hoist.
